

Phase 4 – Project Planning

AI WeatherWise Project

1. Project Work Plan

This sequence follows the supplied project's setup, architecture, backend, database, testing and execution sections.

Stage	Work
1	Brainstorming, problem and solution
2	Requirements and technology setup
3	Architecture, user flow and database design
4	Project setup and configuration
5	Backend and API development
6	MongoDB/Mongoose configuration
7	API testing and bug fixing
8	Documentation and demonstration

2. Team Responsibilities

- Backend/API – Node.js, Express routes, controllers and services.
- Database – MongoDB, Mongoose connection and schemas.
- AI Integration – Gemini integration and weather insight workflow.
- Testing – Postman/Thunder Client and test evidence.
- Documentation & Demo – report, screenshots and demonstration video.

3. Milestone Checklist

- ■ Project setup completed
- ■ Environment variables configured
- ■ Backend server running
- ■ MongoDB connected
- ■ APIs implemented
- ■ API tests completed
- ■ Documentation completed
- ■ Demo video recorded
